Ms. Brinda Westbrook-Sedgwick
Commission Secretary
Public Service Commission
of the District of Columbia
1325 G Street NW, Suite 800
Washington, DC 20005

Re: Formal Case No. 1171 – In the Matter of the Investigation into the Community Renewable Energy Facilities Practices in the District Bi-Weekly Report of Potomac Electric Power Company

Dear Ms. Westbrook-Sedgwick:

Pursuant to Order 21908, in Formal Case 1171 issued on September 28, 2023, by the Public Service Commission for the District of Columbia (“Commission”), the Potomac Electric Power Company (“Pepco” or “Company”) was directed to submit Bi-Weekly Reports. This is Pepco’s Twenty-second Bi-Weekly Report, regarding Community Renewable Energy Facilities (“CREFs”).

The Commission has requested that Pepco address the following topics in the Bi-Weekly Report:

- i. The number of CREF meters with cellular or wireless devices that Pepco is reading;
- ii. The Number of CREF meters being read by Pepco (including make and model and change from the prior week);
- iii. A list of CREF owners and/or Subscriber Organizations (“SO”) and the number of hours the SO has spent on meeting and site visits with Pepco; and
- iv. An Excel spreadsheet with location, meter make/model, whether Pepco has read the meter in the previous month or relied on default values, total number of subscribers, number of subscribers that received a monthly credit, and whether any unsubscribed energy Payment was made for the previous month.

Section i. The number of CREF meters with cellular or wireless devices that Pepco is reading.

Pepco has begun the process of developing an automated solution which can remotely access CREF generation data that is fed through the CREF's existing connections. Currently, no CREF meters are being read via a cellular or wireless device.

Section ii. The number of CREF meters being read by Pepco.

Pepco was able to download actual generation data for 166 CREF meters for the current billing period which is reflected in the CREF Meter Status document.¹ Pepco is using default values as of August 2023 to provide credits and unsubscribed energy payments for 179 meters and System Sized Estimates (PV Watts) for 23 meters. These default values are used for CREF meters that the Company is not currently obtaining a generation reading.

As reported in the November 2, 2023, Technical Conference held by Commission Staff, Pepco removed all Pepco meters from CREFs except for one active Virtual Community Renewable Energy Facility ("VCREF").

Section iii. and iv. Hours CREFs have spent on meetings/removal of meters and Spreadsheet with unsubscribed energy payments and subscriber credits.

Attached are updates to the documents that provide the information requested in the Commission's Order. The attachments are as follows:

1. **Subscriber Organization Meetings** – Attachment 1 provides Pepco's assessment of the time CREFs/Subscriber Organizations have engaged to date with Pepco for meetings. The tab provides dates and durations by CREFs/Subscriber Organizations. Pepco compiled this information by reviewing the scheduled meeting times on the calendar invite with the CREF/Subscriber Organizations—the actual meeting may have been longer or shorter.
2. **Subscriber Organization Engagement on Site** – Attachment 2 provides Pepco's assessment of the time CREFs/Subscriber Organizations have engaged to date with Pepco on site related to meter removals. The tab provides dates and durations by CREFs/Subscriber Organizations. Pepco compiled this information by reviewing the scheduled meeting times on the calendar invite with the CREF/Subscriber Organizations—the actual

¹ Pepco's automated solution communicated with 169 meters to read their generation. However, of the 169 meters Pepco communicated with via its automated solution, there are 3 meters where the devices are unreadable during the current billing cycle. These meters are reflected in Attachment 3 as "Device Unreadable."

meeting may have been longer or shorter. If an SO is not listed on this Attachment, then there was no engagement with the SO on site.

3. **CREF Meter Reading Status** – Attachment 3 provides the location, CREF meter make and model, whether the meter was read, or default value was used for the reporting period, total number of subscribers, and CREFs/Subscriber Organizations that received a monthly credit and any unsubscribed energy payments to date. The total number of subscribers are grouped by CREF owner in this Attachment. Note: there are some “unknown” values in the “Meter Model” column because Pepco has not received meter model information from those CREFs.

Based on the information Pepco currently has for the 370 CREF locations, Pepco estimates that 319 CREF Meters are American National Standards Institute (“ANSI”) 12.20 compliant. However, Pepco notes that it is seeking additional information from some of these 319 CREFs on whether their meters meet the requirement in the regulations to produce interval data. The Company still does not have information on 15 CREFs meter makes and models to assess ANSI compliance and interval data capabilities.² Pepco will continue its communication attempts with these CREFs to obtain information on their make and models. As Pepco receives this information, it will provide updates in subsequent Reports.

Sincerely,

/s/ Kunle Adeyemo

Kunle Adeyemo

Enclosures:

Cc: All parties of record

² CREF subscriber organizations that provided the meter manufacturer as Solaris were incorrect as Solaris is a distributor and does not manufacture meters. Additional information will be required for the subscriber organizations that provided Pepco with Solaris as the meter make.
