b/ Maryland program began in November 1996.

c/ The percentage of customers choosing an alternative supplier for Virginia represents all residential customers as being eligible to participate. However, due to enrollment limitations, only 30% of all residential customers (as of 1/01) were actually allowed to participate in the program at that time. Effective January 1, 2001, 150,000 Virginia residential customers were eligible to participate in the program.

d/ Effective January 2002, all Virginia residential customers were eligible to participate in the program.

As of April 2004, Virginia data includes Sherandoah Gas data.

a/ Average DC residential customer data (normal weather therms updated Feb. 2013).

b/ Prices include balancing charges.

c/ Amount customer would have saved had they switched to transportation service with the respective supplier.

d/ New daily balancing charge + 0.0109 takes effect

Scenario assumes customer signed new 1 year contract in 1/2024

Therefore, contract price of \$0.6640 is good until 12/2024.

a/ Average DC residential customer data (normal weather therms updated Feb. 2013).

b/ Prices include balancing charges.

c/ Amount customer would have saved had they switched to transportation service with the respective supplier.

d/ New daily balancing charge + 0.0109 takes effect

Scenario assumes customer signed new 1 year contract in 1/2024
Therefore, contract price of \$0.6640 is good until 12/2024.

a/ Average DC residential customer data (normal weather therms updated Feb. 2013).

b/ Prices include balancing charges.

c/ Amount customer would have saved had they switched to transportation service with the respective supplier.

d/ New daily balancing charge + 0.0109 takes effect

Scenario assumes customer signed new 1 year contract in 1/2024
Therefore, contract price \$0.6640 is good until 12/2024.
