E-Filed

Brinda Westbrook-Sedgwick
Commission Secretary
The Public Service Commission
of The District of Columbia
1325 G Street, NW.
Suite 800
Washington, DC 20005

Dear Ms. Westbrook-Sedgwick:

Enclosed are changes to Private Line Local Channel Service, P.S.C. – D.C. – No. 6 for AT&T Corp. with an effective date of September 16, 2020.

Section 6, 1st Revised Page 1
Original Page 2

This filing is being made in conjunction with the FCC's approval of AT&T's 214 filing, Application of AT&T for Discontinuance and Reclassification as Private Carriage, in Docket WC 19-323 (approved December 28, 2019). As a result of that application, AT&T now offers AT&T Ultraviable[®] Network (UVN) Service as private carriage. Through this filing, language is being added to the intrastate offering for AT&T Ultraviable[®] Network (UVN) Service to indicate that AT&T reserves the right to make individualized decisions regarding the provision of service to individual customers, and that AT&T may negotiate specific prices and terms for each individual customer.

These tariff pages are filed pursuant to Section 2510 of the Commission's Rules, and is "deemed just and reasonable upon filing" pursuant to Section 3501.12 of the Commission's Rules.

Sincerely,

A handwritten signature in black ink that reads "Maureen Fastuca".

Maureen Fastuca

6. AT&T ULTRAVAILABLE® NETWORK (UVN) SERVICE

6.1 GENERAL

AT&T Ultravailable Network Service is a fully managed, high-speed, optical transport service that provides custom optical networking solutions for interconnecting customer's data centers and business sites in a Metropolitan Area Network (MAN) environment with the ability to extend the MAN into the WAN. Customers have visibility into their network performance via the AT&T BusinessDirect® portal and Ultravailable NetView, along with a dedicated Lifecycle Manager throughout the duration of their contract.

AT&T reserves the right to make individualized decisions regarding the provision of AT&T Ultravailable Network Service to individual customers. AT&T may negotiate the specific prices and terms for AT&T Ultravailable Network Service for each individual customer.

(N)

|

(N)

AT&T UVN offers inter-connection to other ILEC/CLEC's Co-location facilities, carrier hotels, AT&T's IDCs, or any other AT&T provided service, enabling customers to utilize UVN for applications such as but not limited to:

- Disaster Recovery
- LAN extension
- Disk mirroring

AT&T UVN offers these "high-availability network" services to customers and provides multi-protocol support. UVN supports multiple protocols concurrently on the same fibers to interconnect enterprise servers. Supported protocols include:

- FICON
- Fiber Channel
- Fast Ethernet
- Gigabit Ethernet
- DS-1/DS-3
- OC-3 through OC-192
- 10GE LAN/WAN PHY

AT&T UVN integrates SONET Synchronous Optical Network and Dense Wavelength Division Multiplexing (DWDM) technologies into a single end-to-end network solution. UVN uses Dense Wavelength Division Multiplexing to allow multiple frequencies or wavelengths of light that can be used to carry up to 44 different streams (or channels) of data, each up to 10 Gbps.

UVN can traverse LATAs and state boundaries (Interstate).

6. AT&T ULTRAVAILABLE® NETWORK (UVN) SERVICE

6.2 UVN DESIGN

(M)

AT&T Ultravailable Network (UVN) is a custom designed solution based upon specific customer requirements.

6.3 UVN AVAILABILITY

AT&T Ultravailable Network (UVN) is a domestic AT&T product and is offered subject to the availability of the facilities and equipment required to provide the service. UVN Service may only be purchased under this tariff by customers whose traffic on the service will be at least 90% intrastate in nature.

UVN service can support both intrastate and interstate traffic, and is available for purchase under AT&T's Interstate Service Guide by customers whose traffic on the service will be more than 10% interstate in nature.
