Within the next 30 days (60 days per state requirements for AZ and PA) your monthly billing statement will reflect a price adjustment on legacy voice services. Traditional basic voice lines will be adjusted to a minimum price of \$50.00, or the max allowed per state. The associated voice features continue at the lower price point, but may be adjusted, not to exceed \$10.00. Other legacy voice services may reflect a rate increase not to exceed 25%. These price changes typically will not impact all charges on your invoice. We encourage you to contact your account representative to discuss product conversion options that will enable you to migrate off aging technology. We sincerely appreciate your business and look forward to continually expanding our technology solutions to meet your ongoing needs. If you have questions, please contact Windstream at the number listed on this billing statement.

The controller can be a PBX or other intelligent peripheral devices. The number of transfers is limited to the number of B-channels the customer purchases.

SECTION 8 - MISCELLANEOUS SERVICES8.23 Direct Trunk Overflow

The Direct Trunk Overflow (DTO) feature, where available, gives the Customer another termination option if all of their DID trunks are busy. This all-trunks-busy condition may be caused either by legitimate heavy incoming traffic or by a trouble condition where the T-1 system is down and the 5ESS senses that trouble as an all-trunks-busy condition. During either busy condition, the incoming call attempts to terminate to the DID group. When the 5ESS sees all trunks busy, it will choose an alternate route for the call to a telephone number that is programmed in the 5ESS only. This telephone number has the Call Forward Remote feature assigned to it and forwards the call to a number chosen by the Customer.

Remote Access DTO enables the customer to activate and/or update the Call Forwarding on their DTO from any location. The customer uses a provided remote-access toll free number, the DTO Call Forwarding line and their four-digit PIN to review or change their call forwarding number.

At the Business Customer's request, the Company may assist in activating or updating their Call Forwarding (or Call Forwarding on their DTO). The Company will provide this assistance at no cost to the Customer if the request is due to a problem with the PAETEC network. If it is not a PAETEC network problem, then the Customer will be billed a non-recurring charge per line.
