Re: PEPAMIR

Dear Ms. Westbrook-Sedgwick:

Enclosed please find the Potomac Electric Power Company's Advanced Metering Infrastructure Deployment Quarterly Status Report as of September 30, 2019 in compliance with Order No. 17679, issued on October 27, 2014, in the referenced proceeding.

Please feel free to contact me if you have any questions regarding this matter.

Sincerely,

Is/Dennis P. Jamouneau

Dennis P. Jamouneau

Enclosure:

cc: All Parties of Record

POTOMAC ELECTRIC POWER COMPANY DISTRICT OF COLUMBIA FORMAL CASE NO. 1056 ADVANCED METERING INFRASTRUCTURE DEPLOYMENT QUARTERLY STATUS REPORT AS OF September 30, 2019

On October 27, 2014, the District of Columbia Public Service Commission (Commission) issued Order No. 17679 in Formal Case No. 1056 directing Potomac Electric Power Company (Pepco or the Company) to file quarterly reports describing the Company's progress in deploying its Advance Metering Infrastructure (AMI) system. The Commission directed Pepco to file quarterly reports after December 31, 2015 coincident with the disbandment of the AMI Task Force.

As of September 30, 2019, the status of Pepco's AMI deployment in the District of Columbia is as follows:

Number of Activated AMI Meters	315,477
Number of Non-Activated AMI Meters	2,872
Total Number of Installed AMI Meters	318,349
Number of Non-AMI meters	2,422
Total Number of Meters	320,771

Non-Activated AMI Meter population consists of some Net Energy Metering locations; some meters which require communication remediation including additional communication equipment installations and further testing of internal programs; and Pepco's large commercial customer meters that are processed through the Company's Billing Expert billing system. At this time, the Billing Expert system has not been integrated with the Company's Solution One Customer Relationship Management and Billing System due to the complexity of their billing requirements. These billing requirements are under review and options are being considered.

Non-AMI Meter population consists of:

Residential meters 874 (710 located inside and 164 located outside)
Non-Residential meters 301 (226 located inside and 75 located outside)

Total 1,175

The 1,175 Non-AMI meters have been identified as Hard to Access and the meters have not been exchanged due to restricted meter access, or unsafe access. Each of these meter locations is currently being evaluated to identify specific actions that would allow for a meter exchange. Pepco is unaware of any specific customer concerns but continues to contact customers to gain access to the Hard to Access meters.

Please also note that there are over 1,000 meters in the District of Columbia that where possible, Pepco has targeted for conversion to AMI meters. This group consists of meters associated with Pepco facilities, WMATA (3 remaining), Comcast, large commercial customers with legacy MV-90 meters where it is of value, and inactive meter locations. Pepco continues to evaluate, as appropriate, opportunities to convert these meters to AMI meters.

Certificate of Service

I hereby certify that a copy of Potomac Electric Power Company's Advanced Metering Infrastructure Deployment Quarterly Status Report as of September 30, 2019 was served on October 8, 2019, on all parties in Docket PEPAMIR by electronic mail.
